

Climate Action

Climate Change Action at WODC

What is WODC doing?

- Declared a climate and ecological emergency
- Pledged to become a carbon-neutral council by 2030
- Conducted a Climate Change survey
- Published a report on Climate Action for West Oxfordshire to set out a proposed framework for:
 - developing a Carbon Action Plan to deliver our carbon-neutral commitment
 - developing a Climate Change Strategy for West Oxfordshire

WODC Climate change survey results

- 446 people responded (1 in 250 residents)
- Many were not aware of what WODC is doing to tackle climate change
- 334 people said climate change in general was a high priority for them
- Only three people said this was not a priority
- The two top ranked priorities were biodiversity and green transport infrastructure

80% of respondents said they have changed what they buy

81% have improved their garden for wildlife

60% have switched to a green energy tariff

59% have installed energy efficiency or water saving measures

50% ride a bike and walk weekly

GreenTEA says

- We support WODC's Area Action Plan for the garden village to be a net zero development
- We want the same standards for West Eynsham
- WODC are contributing to our Smart and Fair Futures project for all of Eynsham
- Keep in touch!

Final thoughts on what we can do.....

We are in a climate and ecological emergency

...but we already know many of the solutions

the future is in our hands
